Professional Summary

Hi, I'm Jake. I am an experienced UX, UI and product designer.

Over the past 10 years, whilst working for a broad range of organisations, I have helped to design, deliver and continuously develop industry leading digital products and experiences for millions of users worldwide.

I am highly collaborative, and enjoy working cross functionally to deliver digital products, services and experiences, that both cater to the diverse needs of users and deliver exceptional value to organisations.

Leveraging my breadth of design skills and experience, I aim to ensure that the digital products and experiences I help to create are simple, intuitive and purposeful.

Experience

Aug 2023 - Present

UX Designer | Debenhams

- Defined and launched the new Debenhams UX function post-acquisition, establishing design processes, principles, and a cross-functional operating model for the digital product team.
- Mentored designers and developers to increase UX understanding and maturity within the organisation. Became the representative for UX design cross-functionally building relationships with other departments and supporting wider teams with design and creative activities.
- Delivered and scaled a unified design system and brand framework supporting 8+ brands and sub-brands, improving design velocity and cross-brand consistency.
- Drove CRO experimentation and design optimisation programme, delivering incremental revenue gains through data-informed design hypotheses and iterative testing.

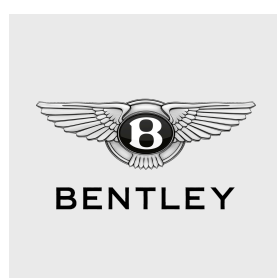

2021 - July 2023

Project (Lead) UX/UI Designer | Aston Martin Lagonda

- Conducted thorough benchmarking and competitor/market analysis studies both independently and in collaboration with industry partners such as Screens and SBD Automotive and presented findings to Aston Martin C-Suite and senior leadership.
- Led the planning and execution of customer research, prototyping, design, and user validation testing within the R&D function - with a primary focus on native iOS and Android mobile apps and the digital customer experience post-purchase.
- Designed and validated information architecture, wireframes, interaction design flows, prototypes and final UI for multiple features across native connected car app, website, configurator and infotainment system
- Managed external agencies, partners and a team of contracted UX/UI specialists whilst

collaborating with internal cross-functional departments and partner - becoming the “bridge” between internal strategy and external execution/delivery.

- Conceptualised, defined, built and maintained Aston Martin’s first digital design system, derived from a new brand refresh
- Reported on and presented research outcomes and insights, design concepts and project progress to Aston Martin C-Suite and senior leadership

2018 - 2021

UX/UI Designer | Bentley Motors

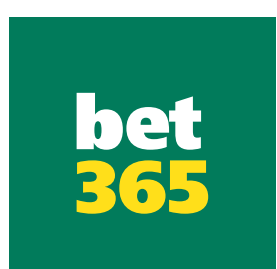

- Supported the Digitalisation and Innovation team in the execution of Bentley's digital transformation
- Led and managed UX/UI projects across customer-facing, B2B, and internal enterprise platforms, projects, and tools, with a primary focus on internal and external native iOS and Android applications
- Assembled and mentored a team of 20 digital apprentices
- Built, maintained and evolved multiple digital design systems for internal and external native iOS and Android applications
- Collaborated with VW Group brands (Porsche, Lamborghini, Audi, Seat, Skoda, and more) on various projects and initiatives
- Supported Bentley's senior leadership in defining the Beyond 100 Strategy and vision

2017 - 2018

UX Designer | The Co-Operative Bank

- Led UX/UI design for The Co-Operative Bank's new iOS and Android mobile banking app
- Collaborated with business-wide departments and stakeholders
- Supported marketing, brand, and research teams

2016 - 2017

UX/UI Designer | bet365

- Helped bet365 transition from a graphic-focused web design team to a modern user experience and user interface team
- Introduced design tools and processes enabling an improved customer betting experience and product satisfaction
- Delivered multiple projects to bet365's 6 million daily active users across iOS and Android mobile applications, as well as web touch points

2015 - 2016

UX/UI Designer | Barclays Mobile Banking

- Helped to transition design capabilities from external partners to an in-house UX/UI capability for Barclays' native iOS and Android mobile applications (Barclays Mobile Banking, Barclaycard and Pingit)
- Delivered multiple projects/features for native iOS and Android mobile applications and supported the scaling of active mobile banking users from 3 million to 6.5+ million in less than 12 months
- Built, evolved and maintained digital design language and mobile UI kit

2014 - 2015

UX/UI Designer & Creative Consultant | Barclays Innovation Team

- Worked as part of a small in-house creative team
- Delivered various creative projects including TV commercials, print, and digital graphics
- Delivered multiple digital products and concepts across native iOS and Android apps, as well as web, for both Barclays and other external organisations such as Childline

My Skills

Discovery, Research and UX Design

- Leading project discovery activities, defining remote and in-person user testing sessions and customer clinics using UX industry best practices, tools and resources (such as moderated/unmoderated interviews, A-B testing, Tree Testing, and Card Sorting)
- Supporting and guiding research activities with hypotheses, concepts, and high-fidelity prototypes
- Creating wireframes, storyboards, user flows, and site maps/state charts/flow charts to effectively communicate designs to partners, developers, stakeholders, etc.
- Collecting and analysing qualitative and quantitative data from user testing and analytics, synthesising findings, and presenting insights to the wider business, along with defining and supporting the implementation of data driven solutions

Visual / UI Design, Prototyping and Technical Knowledge

- Overseeing, directing and executing UI and visual design from concept to handover at a pixel-perfect and AAA accessible standard whilst remaining on brand and on trend
- Staying up-to-date with and promoting industry best practices, trends, and standards
- Creating high-fidelity prototypes using a wide range of tools
- Creating, maintaining and evolving multi-faceted design systems, component libraries and brand/CI guidelines
- Extensive knowledge of native mobile application patterns, standards, and guidelines (iOS, Android, etc.)
- Sound understanding of HTML/CSS, Javascript and databases
- Strong expertise in HMI, vehicle interfaces, switchgear and general automotive technology developments
- Strong all round understanding of front-end and back-end processes and systems

Stakeholder management, Collaboration, Communication and Strategy

- Collaborating and communicating respectfully, transparently, effectively, and productively with senior leadership, business-wide stakeholders, and employees at all levels
- Defining, communicating, and delivering future product and service direction, strategy, and experiences
- Regularly reviewing the work of peers and colleagues, and providing effective feedback
- Leading, mentoring, and developing UX/UI and business-wide junior, mid-weight, and senior employees/team members
- Experienced working in an agile/scrum development process, in fast-paced environments with a startup mentality as well as large corporate environments with complex organisational structures and reporting lines
- Possessing the ability to influence and define future visions and strategies, as well as roadmaps to achieve desired outcomes and goals for businesses and their users.

Testimonials

Testimonial of Jake Rayner by Richard Ramsden, Senior Product Manager at Aston Martin.

"I worked with Jake very closely over the last 18 months or so. Jake led on the internal liaisons with the internal UX teams and also managed external Conjure teams. He had an incredible ability to digest, understand and to challenge what was required to then provide successful concepts. We definitely wouldn't be where we are now as a project if it wasn't for him pushing us along.

Jake is massively independent and self sufficient. We would work closely together and agree between us what needs doing, and he would get it done quickly and come back with solutions, designs and questions. He was good with dealing with immediate projects and needs, but always prepared for what was coming up on the horizon and what was around the corner.

He's got a strong approach and process and he works with an overall framework. He's very keen on processes and understanding them, as well as challenging them to make a better environment. Equally, he's realistic and knows that some things just need to be done – so he's flexible in that sense.

He led the UX team through and through, dealing with wider stakeholders and pretty senior figures at Aston Martin. He had a holistic approach across the business, making sure what we're doing aligns with business and commercial, as well as technical requirements and also matches what the user wants and needs.

Jake is a nice guy and a great bloke. He's great to work with, open to suggestions and is quite open with his thoughts. He really knows his stuff and I'd say he's an expert in his field. I've not worked with a Designer like Jake before and if all Designers were like him life would be a dream."

30/06/2023

Testimonial of Jake Rayner by Sam Clark, CEO of Conjure.

"I've worked with Jake for the last year or so. Jake was working internally at Aston Martin and Conjure were working with him on a number of projects and work streams. Jake really impressed during this time for a multitude of reasons.

Jake was the go-to for us on anything design related and he worked with the Conjure team like a hand in a glove. He's a really nice guy, incredibly organised and intelligent, and worked at real pace and autonomy. He's a hard worker and a good thinker, and has a nice balance of being practical and realistic, and he realises that things don't happen overnight.

Equally he is quick out of the blocks and hits the ground running.

The mixture of being pragmatic and realistic, with curious and ambitious, is the staples of a strong and balanced designer.

He's a strong end-to-end designer, probably leaning more towards UX on this project [in terms of how he tackles problems and looks at customer issues], but his UI work was of high quality too. This means he ran things end to end and was able to get things moving and contribute high quality work across everything.

We've been working on this project with Jake for over a year now and unfortunately we can't share much about the actual project. However, I can say Jake has impressed throughout and whilst Jake never technically worked for us here at Conjure I had to say how much he impressed us. If we were in a position to, we would hire Jake in a heartbeat!"
